WAREHOUSE MANAGEMENT

Maximize your warehouse efficiency

Modern online warehouse management software.

The screenshot shows the 'Inventory' software interface. At the top, there's a navigation bar with 'Inventory', 'Dashboard', 'Inventory Control', 'Schedulers', 'Reports', and 'Configuration'. Below that, the breadcrumb path is 'Inventory / YourCompany: Delivery Orders / WH/OUT/00048'. There are buttons for 'EDIT' and 'CREATE', and a 'Print' dropdown menu. A progress bar at the top indicates the order status: RESERVE, FORCE AVAILABILITY, CANCEL, DRAFT, WAITING AVAILABILITY (highlighted), PARTIALLY AVAILABLE, AVAILABLE, and DONE. The main content area shows the order ID 'WH/OUT/00048' and details like 'Partner', 'Source Location Zone: WH/Stock', 'Scheduled Date: 02/11/2016 11:34:15', 'Source Document', and 'Owner'. Below this is a table with columns for 'Product', 'Quantity', 'Unit of Measure', and 'Status'. The table lists three items: Bose Mini Bluetooth Speaker (10,000 units), Apple In-Ear Headphones (20,000 units), and Laptop E5023 (20,000 units), all with a status of 'Waiting Availability'.

Product	Quantity	Unit of Measure	Status
[E-COM05] Bose Mini Bluetooth Speaker	10.000	Unit(s)	Waiting Availability
[E-COM08] Apple In-Ear Headphones	20.000	Unit(s)	Waiting Availability
[LAP-ES] Laptop E5023	20.000	Unit(s)	Waiting Availability

Improve performance and process time

Better organize your warehouse with the smart double entry inventory system

Get the most efficient stocking method and improve all your internal operations. ECI's double-entry inventory has no stock input, output or transformation. Instead, all operations are stock moves between locations.

The screenshot shows the 'Inventory' software interface on a tablet. The top navigation bar includes 'Inventory', 'Dashboard', 'Inventory Control', 'Reports', and 'Configuration'. Below the navigation bar, there's a search bar and a filter section. The main dashboard is divided into several panels: 'Receipts YourCompany' (3 TO RECEIVE, Late, 3), 'Delivery Orders YourCompany' (View, New, Transfer, Settings), 'Receipts Chicago Warehouse' (2 TO RECEIVE, Late, 2), 'Delivery Orders Chicago Warehouse' (1 TO DO, Waiting: 2, Late: 3, Back Orders: 1), and 'PoS Orders' (More -).

Reduce your stock level and avoid stockouts

Take advantage of automatic replenishment methods

Reduce your stock while always staying replenished! ECI Inventory is fully integrated with the Purchase module, so you can trigger automatic RFQs to your suppliers when your stocks levels are too low.

Enjoy advanced and automated functions

The most advanced systems in a very simple user interface

Handle complex routing such as drop-shipping, cross-docking, and multi-warehouse in just a few clicks.

Drop-shipping

In just a few clicks, you can set up drop-shipping rules for each product to automatically have them shipped to customers.

Cross-docking

Order items by weight, size and quantity, and allocate a specific location to easily have each new shipment sent out to other locations.

Multi-warehouse

Create rules to automatically transfer items from one warehouse to another and keep stock levels optimum.

Inventory				
Reordering Rules				
Name	Product	Product Unit of Measure	Minimum Quantity	Maximum Quantity
<input type="checkbox"/>	OP/00006	[ADPT] USB Adapter	Unit(s)	3.000 5.000

Experience full traceability

Keep track of every stock move

Keep an eye on all your stock by tracing all your past and future inventory transactions. Track in detail all stock moves, in your warehouse and everywhere else your stock goes. Browse through the upstream or downstream traceability flows to get a clear view of what happened to a specific product or shipment.

Get clear & complete reporting and dashboard

Keep an eye on the efficiency of your warehouse

Get the insights you need to make smarter decisions, using reporting and dashboards. Design custom dashboards to analyse your warehouse efficiency at a glance. Dig deeper with real-time reports that anyone can create and share.
